

Public Discussion #3: Progress and Bug/Issue Transparency

Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

MySQL Community Engagement Strategy

- Deliver Innovation into Community Edition
- Expand and Grow the Ecosystem
- Increase Transparency & Community Participation
 - Phased approach
 - **Phase 1:** Utilize existing tools for next release with more transparency; publish and act on roadmap, establish baseline metrics and goals
 - **Phase 2:** Increase transparency, openness, and contributions; add more and build on existing tools
 - **Phase 3:** Evaluate and Iterate
- <https://blogs.oracle.com/mysql/new-era-of-mysql-community-engagement>

Release Plans – Release Info

- 9.7 released!
- Next release scheduled for July
- We will build roadmap with the community and continue to identify Enterprise features that can be rolled into Community Edition
- Early Access Releases will be published on regular cadence

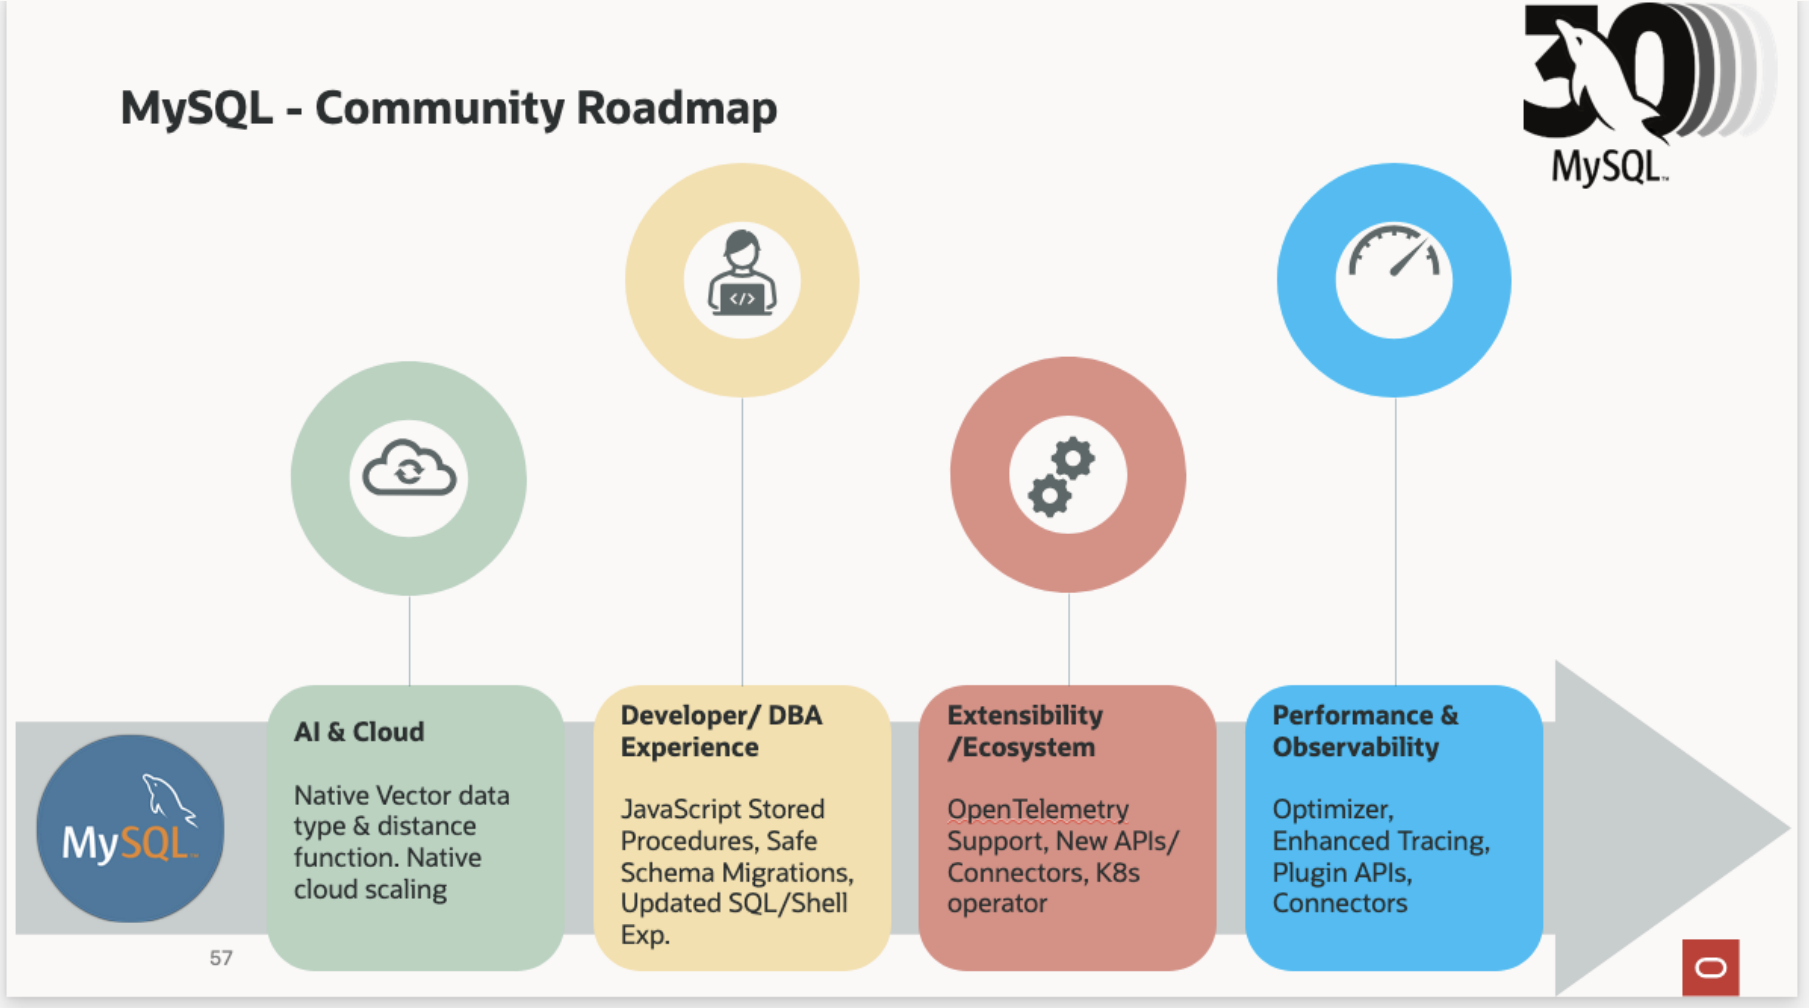

Release Plan – Areas of Focus

- Some CVE information will be available on mysql.com
- Continue to publish worklogs
- Deliver features/functionality that align with our Community Roadmap
 - Vector remains a priority to target for a future release
 - Thread pooling has also been identified as a possible feature for Community Edition

MySQL Community Roadmap

Planet MySQL Updates

Planet MySQL Updates

- Work has started on the planned updates
- Tackling some low hanging fruit to get familiar with the code base
- First big update will include refactoring the filtering process
- Other top priorities include:
 - Easier content submission for community members
 - Ecosystem/Tools Spotlight Page

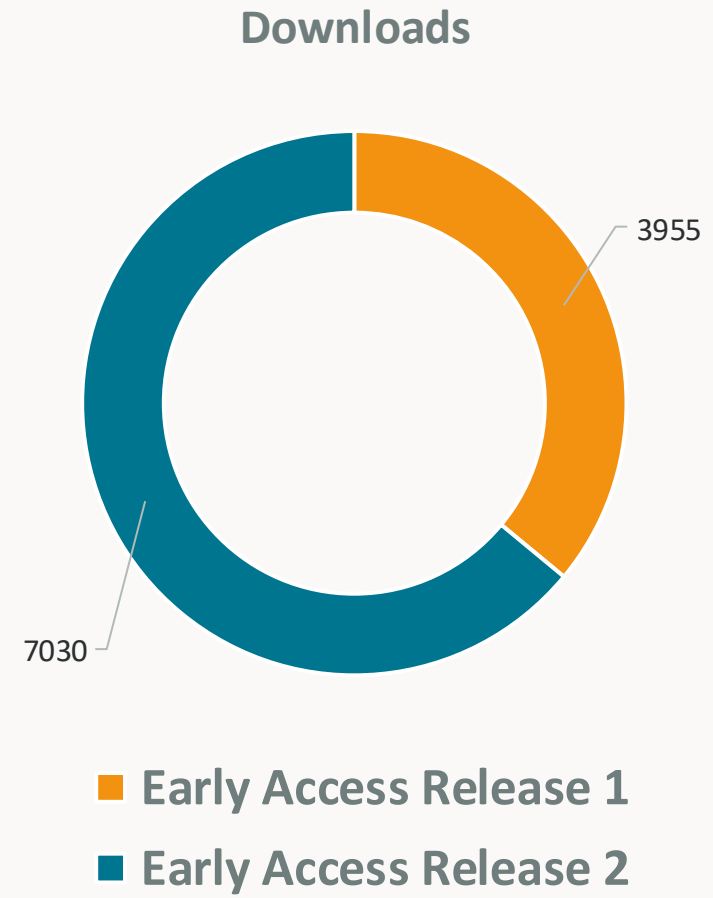

Early Access Releases

Early Access Releases - Overview

- 2 Early Access releases ahead of the public release
- Plans for more frequent Early Access releases in the future

Early Access Releases - Feedback

- Thank you for all your feedback!
- Keep the suggestions coming!
- We will use your feedback to refine the process and improve MySQL

Early Access Releases – Community Involvement

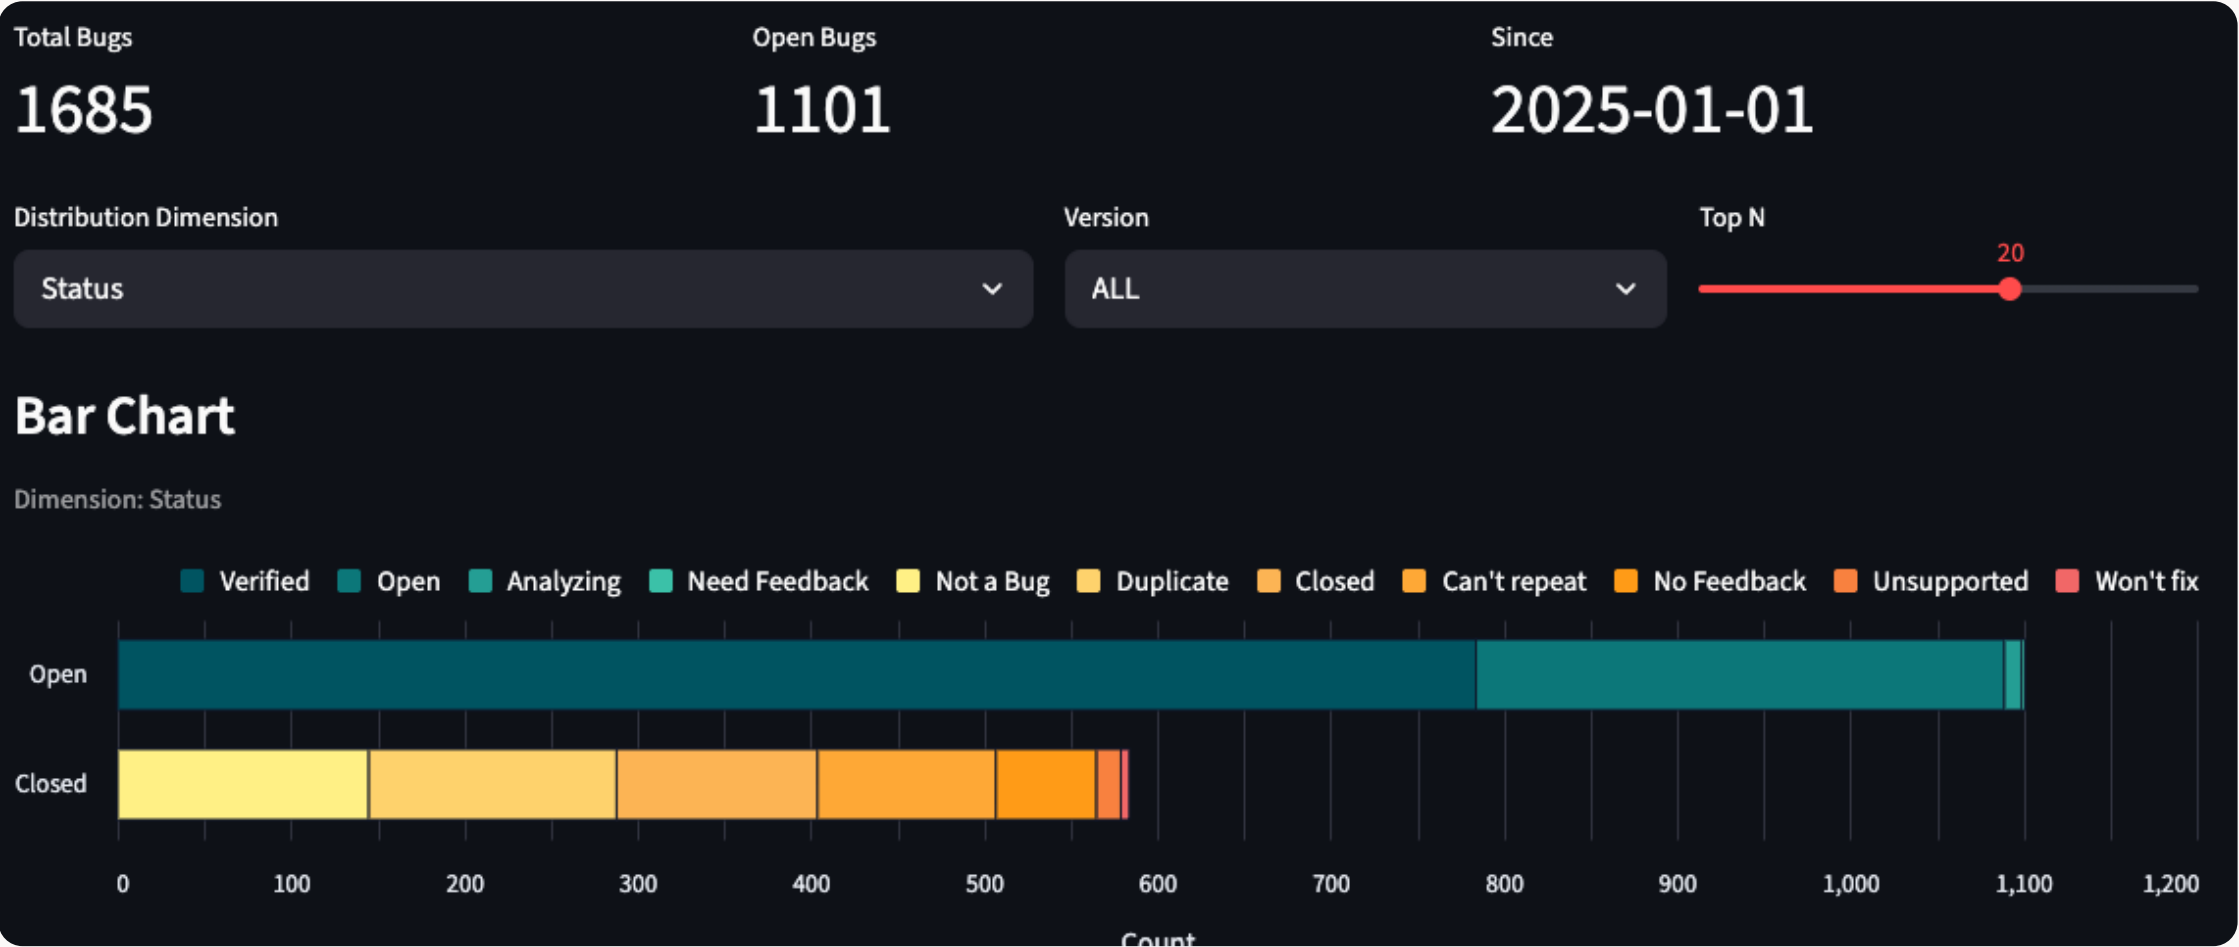

- Practical Testing
- Validation of bug fixes
- Other feedback

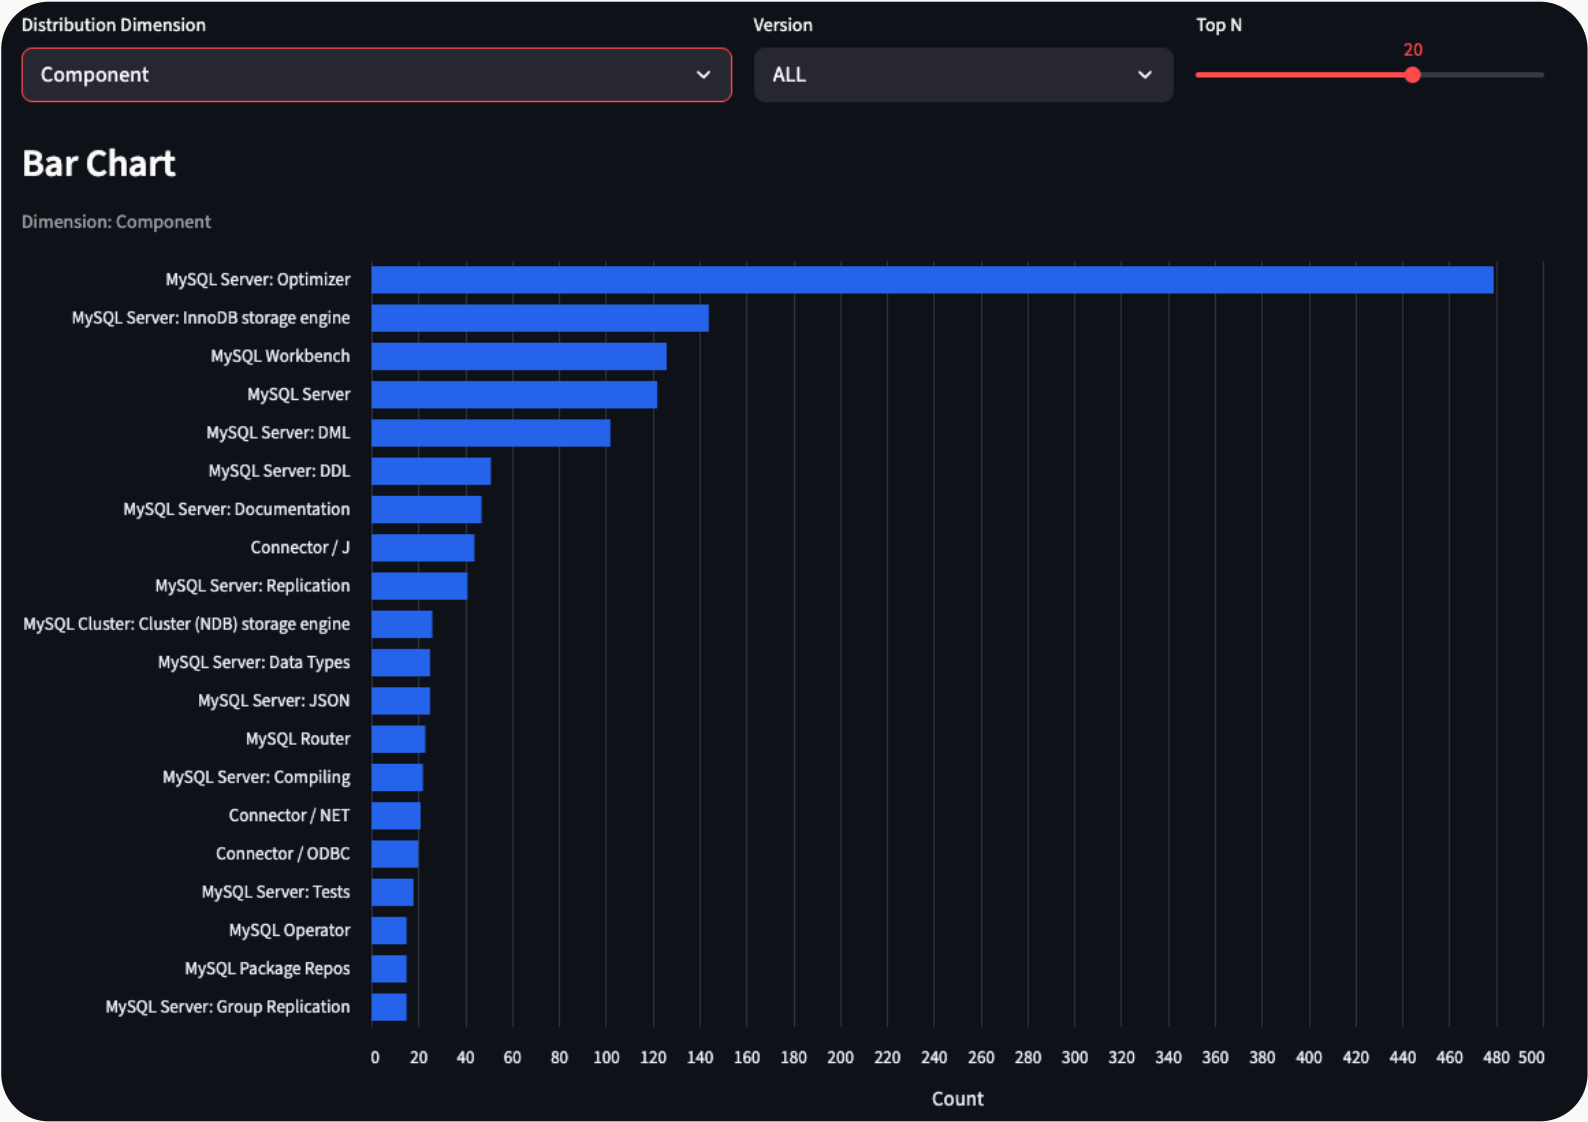

Improved Bug/New Feature Transparency

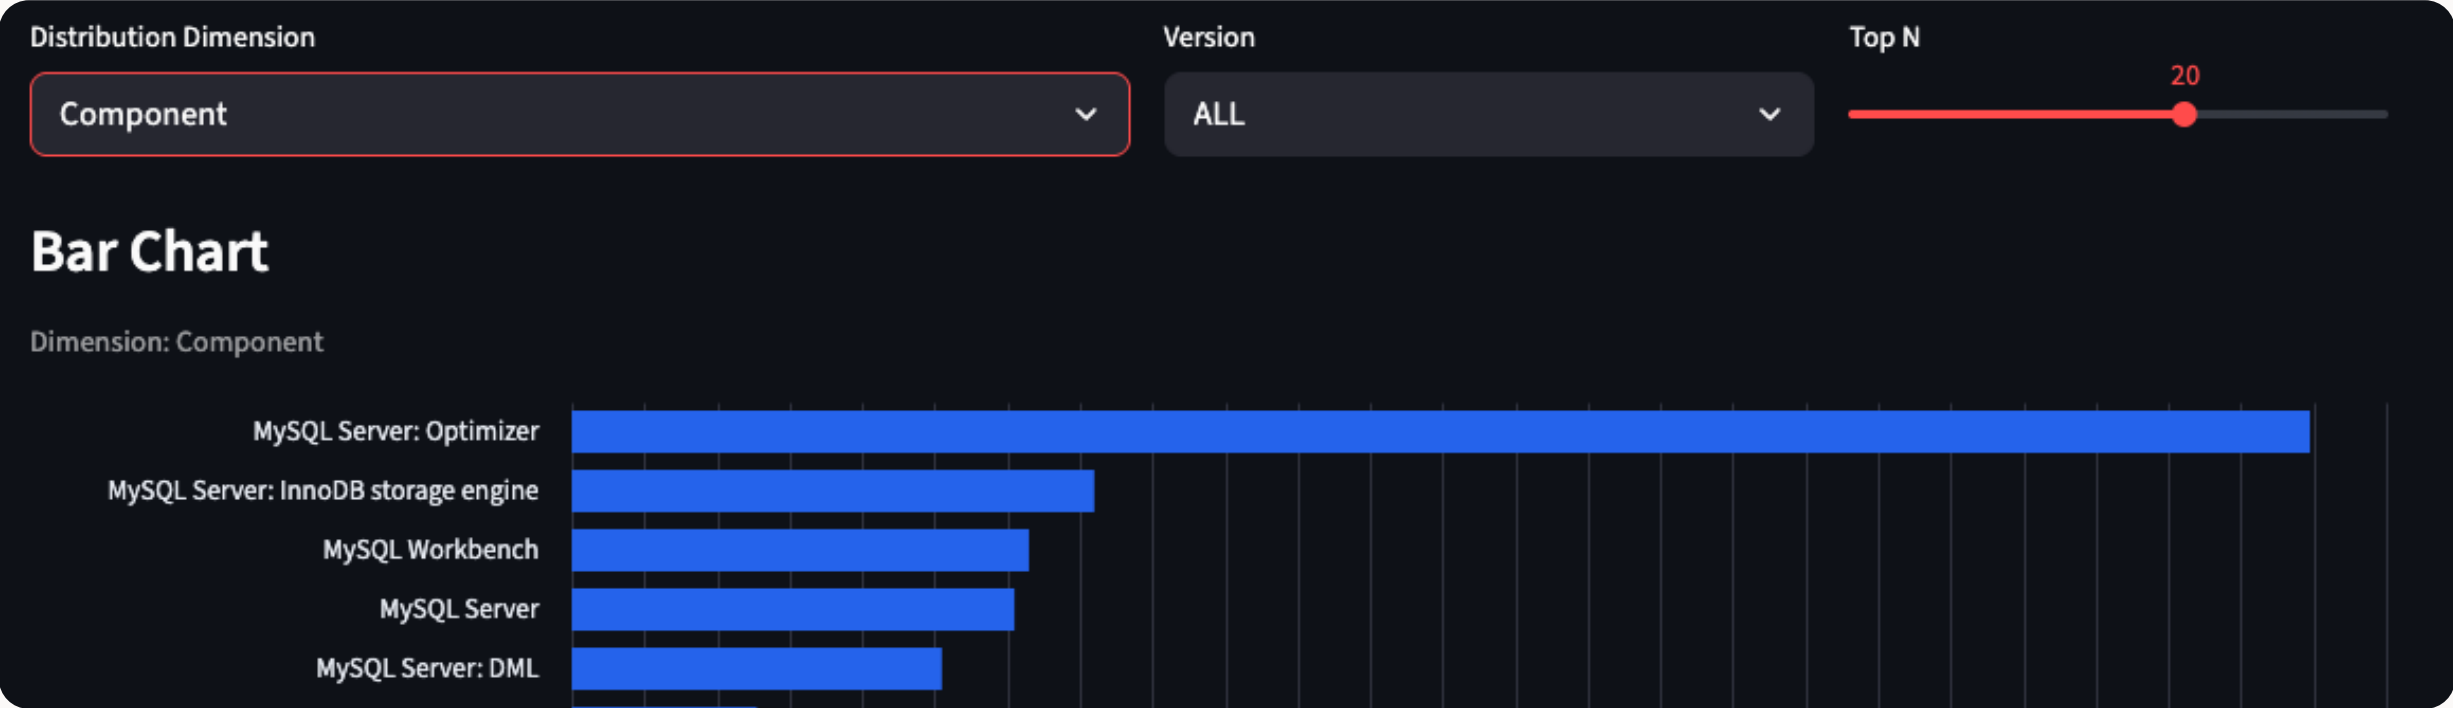

MySQL Bugs & FR Management Improvements

MySQL Bugs & FR Management Improvements

MySQL Bugs & FR Management Improvements

MySQL Bugs & FR Management Improvements

- Considering new tools for bug reports and feature requests
- Crafting templates for bugs and feature requests to standardize input and output parameters
- Working on improving bug triage and communication of progress

MySQL Bugs & FR Management Improvements - Backlog

- Plan to use a phased approach
 - Issues related to 8.x will be targeted initially
- Let us know if you are able to assist with bug verification/have priority bugs to review

Goals – what we will measure

- Sustained, year-over-year growth
 - Community Contributions and Contribution quality
 - New and Core Contributors growth rate
 - Issues addressed, backlog and response times
 - Patches submitted by Community – quantity and quality
 - Innovation – leadership in roadmap projects
 - Event and social engagement and participation

Contributors Summit May 2026

Save the Date – 2026 MySQL Contributions Summit

- Tuesday, May 26, 2026 (pre-meeting Design Review on May 19)
- Hybrid Format, Online and in Person, in Redwood Shores, CA

How to Submit New Feature Request

1. Identify the feature you would like to request
2. Complete the Design Template Proposal
3. File a feature request (<https://bugs.mysql.com> , for now)
4. Attach the Feature Request Proposal from step 2.

New Feature Request – Developer Guide

<https://dev.mysql.com/community/developer-guide>

6. How to request features (FRs)

6.1 Where to file

File feature requests in the [MySQL public bug system](#) (the same place bugs are tracked), using the appropriate

6.2 What to expect

Triage outcomes will typically include existing fields:

- Analyzing (under discussion / being evaluated)
- In Review (accepted for deeper evaluation)
- Verified (tracked, but deferred/unsupported for now)
- Won't Fix (declined, with rationale when possible)
- Closed (Implemented in the product)

6.3 Feature Request checklist

- Choose Severity S4 for FEATURE_REQUEST
- For any feature requests aligned to the roadmap themes highlighted above, use the tag ROADMAP_CANDIDATE. using this tag)
- Clear problem statement
- Why it matters (impact)
- Proposed approach (optional)
- Compatibility considerations
- Examples / test case / sample schema (sanitized)

New Feature Request – Design Template

MySQL Community Design Proposal

Draft the proposal in the form, then review it as a clean document. The primary actions below follow a simple write, preview, and export flow.

Autosaved locally • 4/17/2026, 3:00:34 PM

Formats: JSON / MD / CSV

Save Draft

Preview

Export ▼

Load Draft File

Copy Markdown

Describe the proposed feature, technical change, or request in a few sentences. Explain the user benefit and why this work matters.

User / developer stories

As a MySQL user

I want a consistent way to propose and review technical changes

so that features can be discussed with clear scope, requirements, and reviewable design detail.

In scope

Out of scope / limitations

How to Submit New Feature Request

5. Register for the Contributor Summit
6. Attend the Pre-Summit Meeting to discuss the feature

Additional Information

*Are you going to attend in person or remotely?

☐ In Person

☐ Remotely

*I am interested in presenting

☒ Yes

☐ No

Call to Action

- Oracle invites developers, testers, and community members to participate.
- Upcoming public discussions in May (MySQL Contributions process improvements).
 - Propose suggestions to help us meet and document goals.
- Together, we can shape the future of MySQL.

Call to Action – Provide Feedback

- <https://dev.mysql.com/>
- MySQL Community Edition 9.7 available now.
- Select Worklogs Released
- MySQL Developer Guide v1 Released
- Public MySQL Community Edition Roadmap Summary
