

Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

MySQL Community Engagement Strategy

Deliver Innovation into Community Edition

Expand and Grow the Ecosystem

Increase Transparency & Community Participation

Phased approach

Phase 1: Utilize existing tools for next release with more transparency;
publish and act on roadmap, establish baseline metrics and goals

Phase 2: Increase transparency, openness, and contributions; add more and build on existing tools

Phase 3: Evaluate and Iterate

Planet MySQL Enhancements

What is Planet MySQL?

Planet MySQL (<https://planet.mysql.com>) serves as a centralized hub, aggregating content from various sources to provide the MySQL community with up-to-date information, insights, and discussions.

What is the purpose of Planet MySQL?

Its primary purpose is to foster community engagement, streamline access to diverse content, and support knowledge sharing among MySQL users and developers.

Key Features of Planet MySQL

Content Aggregation

- Collects and displays the latest articles, blog posts, and news related to MySQL from diverse sources.

Community Engagement

- Fosters a sense of community by bringing together users, developers, and enthusiasts to share knowledge and experiences.

Resource Centralization

- Provides a single point of access to a wide range of information, reducing the need for users to visit multiple sites

Proposed Enhancements

Revise Backend Filtering Process

Address community concerns regarding the restrictive nature of the current content filtering mechanism

Proposed Enhancements

Implement Community Content Submission Portal

Facilitate the inclusion of diverse content by allowing community members to submit blogs or blog posts for consideration.

Proposed Enhancements

MySQL Ecosystem Projects and Tools Showcase

Provide a centralized repository that highlights and provides information about third-party tools and projects within the MySQL ecosystem, facilitating community awareness and adoption.

Proposed Enhancements

Integrate Developer Contribution Guide

Provide clear guidance and detailed procedures
for community members interested
in contributing to MySQL development.

Proposed Enhancements

Personalized Content Recommendations

Enhance user experience by delivering tailored content based on individual preferences.

Proposed Enhancements

Enhanced Search and Filtering Options

Improve content discoverability through advanced search functionality.

Proposed Enhancements

Event Calendar and Announcements

Keep the community informed about upcoming events, webinars, and important announcements.

The Goals

Foster Community Engagement

- Empowering members to contribute content and participate in moderation cultivates a sense of ownership and collaboration.

Enhance Content Accessibility

- Personalized recommendations ensures users have timely access to relevant information. Focus on ecosystem and not commercial offerings

Improve User Experience

- Advanced search functionalities and an event calendar provide intuitive navigation and keep the community informed about important developments.

Call for Contributors to Project

Starting a workstream led by Scott to develop the project

Measuring Community Engagement and Contributions in MySQL

Our Commitment to MySQL Community

- Continued investment in MySQL innovation and stability – driving new features into MySQL Community Edition.
- Growing and evolving the MySQL ecosystem to reflect its vibrant and collaborative nature.
- Encouraging meaningful community engagements and contributions from MySQL users and developers worldwide.

Community Contributions – Recent Trends

List of most active MySQL Contributors in last version

Thank you!

- Kolbe Kegel
- Frédéric Barrière
- Chengjun Huang
- Feng Shen
- Kristoffer Sjöberg
- Casa Zang (Tencent)
- Jingqi Tian (Alibaba)
- Artem Avetian
- Yin Peng (Tencent)
- Jeong Geun Lee

Bug Fixes– Recent Trends

Goals – what we will measure

- Sustained, year-over-year growth
 - Community Contributions and Contribution quality
 - New and Core Contributors growth rate
 - Issues addressed, backlog and response times
 - Patches submitted by Community – quantity and quality
 - Innovation – leadership in roadmap projects
 - Event and social engagement and participation

Learning and Improving

- Recognition of current contribution rates.
- Ongoing review of contribution processes to identify and remove barriers.
- Gathering feedback from community contributors to ensure a positive experience.

Community Goals and Metrics for Future Versions

- Goal: Increase the number and impact of community contributions in upcoming releases.
- Streamline review and merge processes.
- Expand areas to welcome community leadership such as tools, extensibility, plugins, performance, documentation, etc.

Initiatives Underway

- Improve contributor documentation and support.
- Dedicated team members to mentor and collaborate with contributors.
- Accelerate outreach with open source project leads and communities/events.

Call to Action

- Oracle invites developers, testers, and community members to participate.
- Upcoming public discussions in April (MySQL Bugs and Issue improvements) and May (MySQL Contributions process improvements). Propose suggestions to help us meet and document goals.
- Together, we can shape the future of MySQL.

Call to Action – Provide Feedback

- <https://dev.mysql.com/>
- Early Access Release of MySQL Community Edition 9.7.0 available now (Docker image added!)
- Select Worklogs Released
- MySQL Developer Guide v1 Released
- Public MySQL Community Edition Roadmap Summary
