

ORACLE

MySQL Community Roadmap Discussion February 2026

MySQL Community Team

Heather VanCura

Vice President

Jason Wilcox

Senior Vice President

Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

Agenda

Welcome & Introduction

MySQL Community Roadmap

Next Steps and Feedback: Questions and comments on the roadmap for discussion ; Format and frequency of future sessions (survey)

MySQL Community team

Connect with the MySQL Community team

Heather, Scott, Lenka, Kailas

The team is growing in the US and Europe; contact Lenka for more details

Summary of the Belgian MySQL Days & Actions

January 2026

Reinvigorating the MySQL Community based on Community Feedback

MySQL's strength comes from its community

Add more features to accelerate innovation

Continue to evolve. Your feedback is essential to shape the future

Prompt Strategy to bring MySQL Innovation & Trust

Deliver Innovation into Community Edition

Expand and Grow the Ecosystem

Increase Transparency & Community Participation

Phased approach

Phase 1: Utilize existing tools for next release with more transparency;
publish and act on roadmap, establish baseline metrics and goals

Phase 2: Increase transparency, openness, and contributions; add more and build on existing tools

Phase 3: Evaluate and Iterate

What is going to change

Some previously commercial-only features will be included in the Community Edition

Prioritization of Developer-forward focus

Looking to Empower community contributions

Building with and for the community

Deepening collaboration with users and contributors

<https://blogs.oracle.com/mysql/new-era-of-mysql-community-engagement>

Roadmap

Public and developed with the MySQL Community

Feature requests evaluated based on roadmap fit

Community Feature Selection Principles

Low-risk, easy-to-adopt features will come first

Preserve MySQL's stability and upgradeability

Reviewed in every release cycle

Potential Upcoming Feature Highlights

For Developers:

PGO-Optimized Community Binaries

Vector Functions –delay to engage for more feedback before inclusion

Hypergraph Optimizer

JSON Duality (focused on DML usability)

For Operations:

OpenTelemetry (modern observability and monitoring)

Multi-threaded Applier & Flow-Control Metrics (Enhanced HA/DR analytics)

Some innovations will be delivered as soon as April 2026

Possible Roadmap Categories...what are your thoughts?

AI & Cloud alignment

Vector

Developer experience

Performance

Scaling

Observability

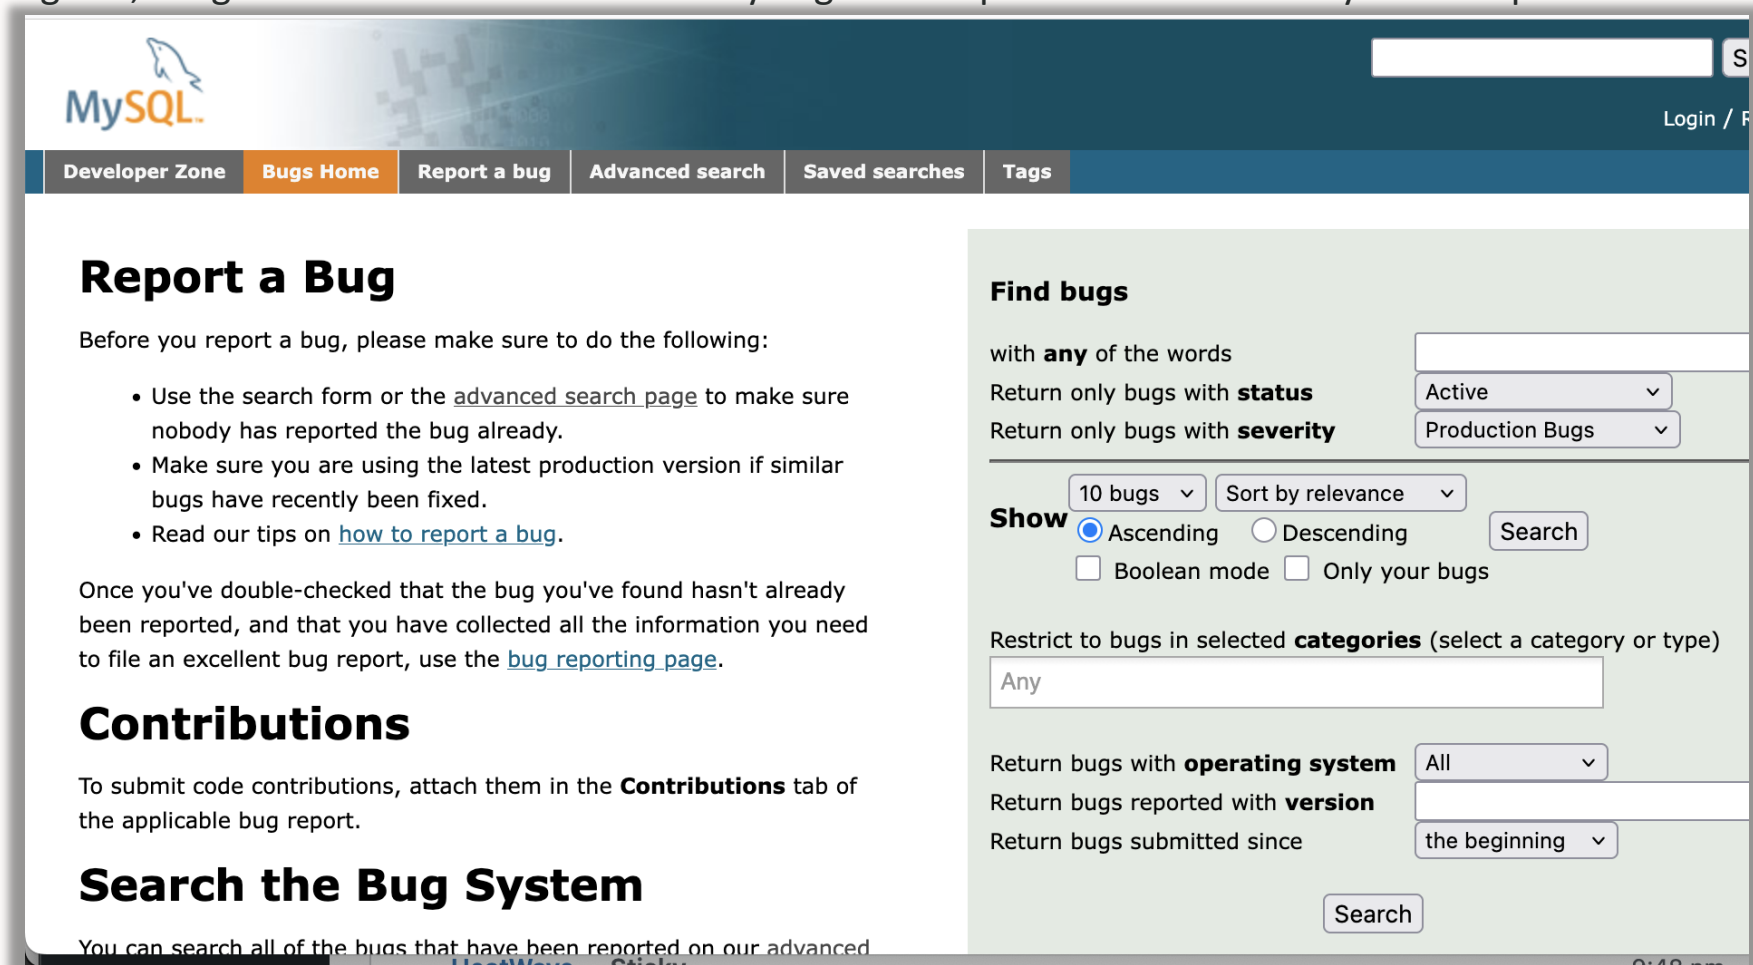

Extensibility

Ecosystem/tooling/connectors

Track Feature Requests via bugs DB

Publish Community Roadmap and then invite new feature request.

Track FRs via bugs db, triage them based on whether they align to the published Community Roadmap

The screenshot shows the MySQL Bug Report page. The header includes the MySQL logo and navigation links: Developer Zone, Bugs Home, Report a bug, Advanced search, Saved searches, and Tags. The main content area is titled 'Report a Bug' and includes instructions on how to report a bug, a list of tips, and a section for contributions. On the right side, there is a 'Find bugs' section with various filters and search options.

Report a Bug

Before you report a bug, please make sure to do the following:

- Use the search form or the [advanced search page](#) to make sure nobody has reported the bug already.
- Make sure you are using the latest production version if similar bugs have recently been fixed.
- Read our tips on [how to report a bug](#).

Once you've double-checked that the bug you've found hasn't already been reported, and that you have collected all the information you need to file an excellent bug report, use the [bug reporting page](#).

Contributions

To submit code contributions, attach them in the **Contributions** tab of the applicable bug report.

Search the Bug System

You can search all of the bugs that have been reported on our advanced

Find bugs

with **any** of the words

Return only bugs with **status**

Return only bugs with **severity**

Show

☒ Ascending ☐ Descending

☐ Boolean mode ☐ Only your bugs

Restrict to bugs in selected **categories** (select a category or type)

Return bugs with **operating system**

Return bugs reported with **version**

Return bugs submitted since

Proposed transparency actions in Phase 1

Open selected Worklogs

Use existing or into new system? Feedback?

Triage bugs and engage on the community bugs database – improve and updates to status/responses

Streamline publishing select security bugs once fix released – suggestions?

Early Release candidate feature freeze/code cut, build and release EA

EA release would be for development only, invite community feedback and comments

Comment in the Bug Database and tag for review and encourage feedback

Establish Community Metrics & Goals

Review past contributions for baseline and work with the community to establish metrics for the next 12 months and beyond.

<https://blogs.oracle.com/mysql/mysql-95-thank-you-for-your-contributions>

Expand and increase engagement around Planet MySQL to highlight ecosystem

Community is managing and looking at options to expand Planet MySQL.

Please contact Scott Stroz for comments/suggestions.

<https://planet.mysql.com/>

Communication Actions Phase 1

Lead a public session with the community for feedback on the MySQL Community Roadmap

Future sessions scheduled on other topics: Planet MySQL, Contributions, Bugs, Providing Feedback, Roadmap topics, Events, etc.

Clearly explain to the MySQL community our engagement approach

Publish community roadmap and invite new feature requests based on that roadmap

Create a developer guide under MySQL Community Contributions page

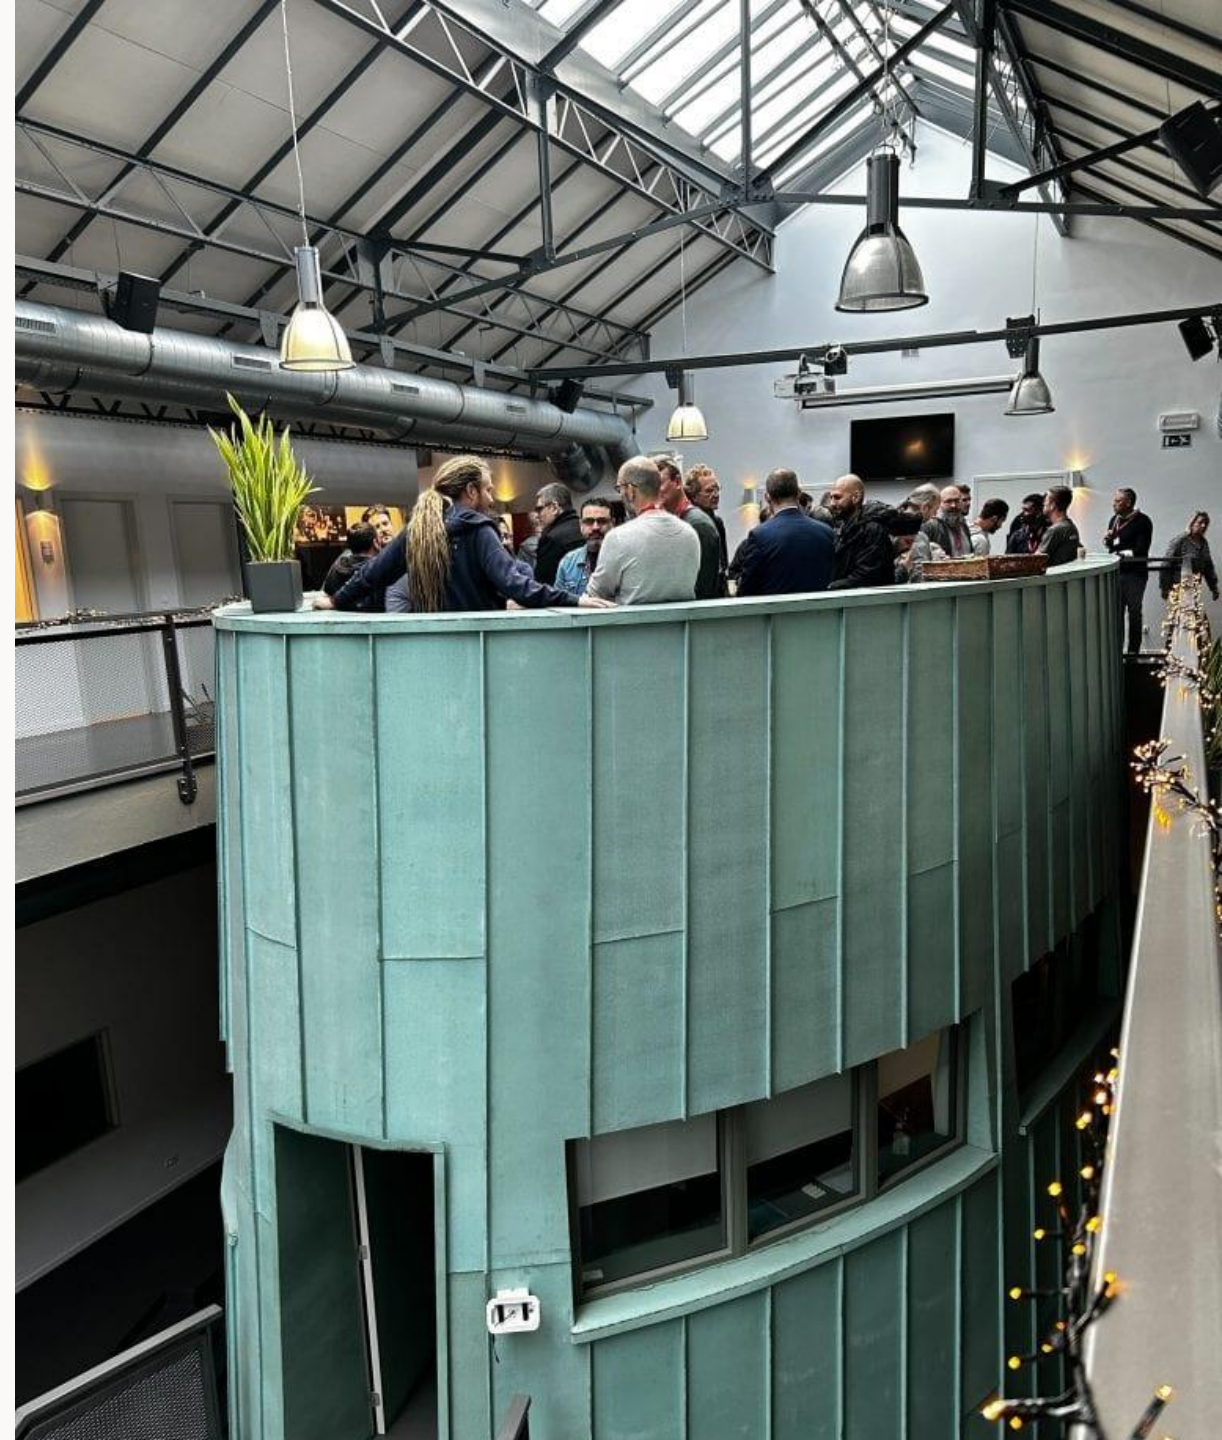

Instructions to provide feedback on the EA release; expand on instructions

Bring more participation into other MySQL Community Team programs – Community News and Events MySQL in Education; MySQL User Groups; you can participate

Next Steps

Meeting cadence and format

How To Get Involved

What would help and motivate you to contribute or participate?

Please

Share ideas and feedback

Together, we build the next generation of MySQL

Be an actor of the MySQL Community

Support MUGs – create new ones, speaks to the existing ones

Academics

Are you working in the academic sector, or do you have connections?

Contact us, we would love to come and deliver lectures, workshops, and hackathons .

<https://dev.mysql.com/community/education/>

Grow with our ecosystem...

Expand PlanetMySQL: broaden reach and highlight more aspects of the MySQL ecosystem

Collaborate with Canonical & Ubuntu

Keep helping and supporting large open source products using MySQL (WordPress, Drupal, Magento, Joomla! ... and more).

Creating content for our social media, our YouTube Channel and our podcast (Inside MySQL – Sakila Speaks).

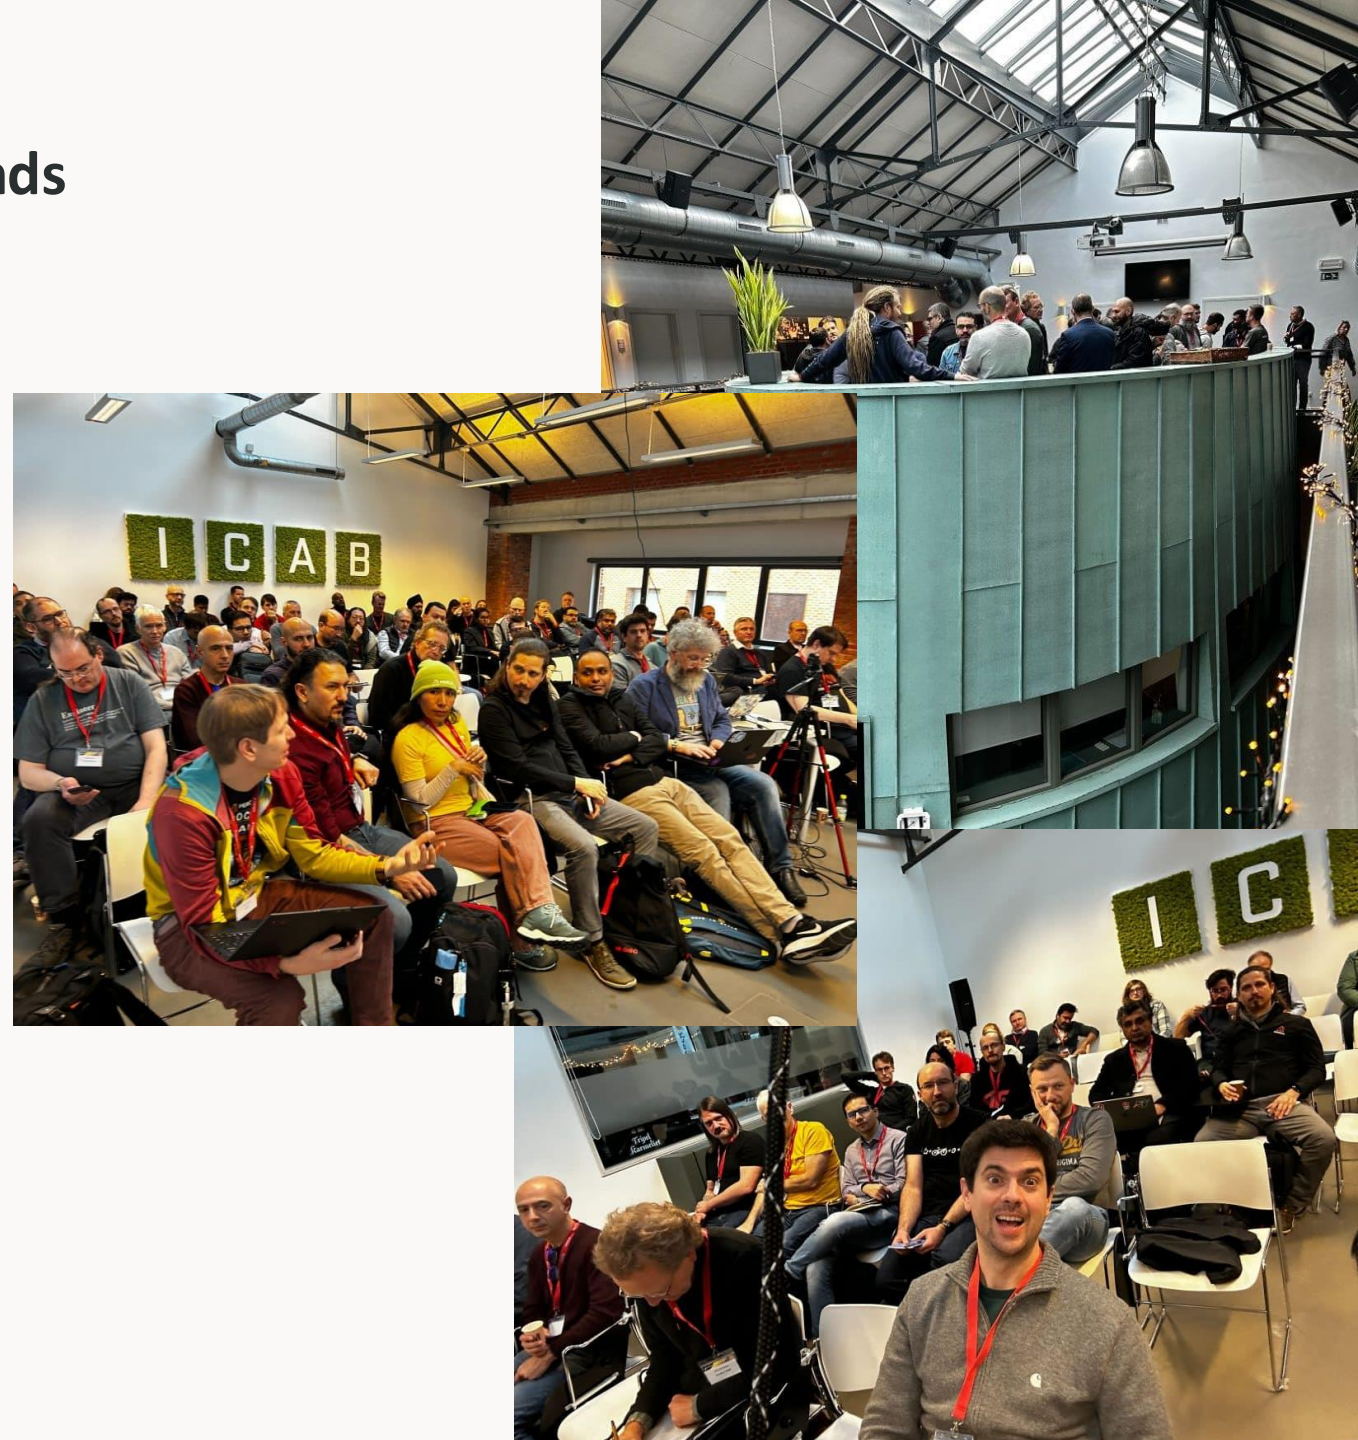

Moderate and manage one of the biggest LinkedIn Group: MySQL

Helping our Community on Slack and other forums

Welcome to our new Rockstars & Legends

- Rockstars:
 - Umesh Shastry
 - Marcelo Altmann
 - Matthias Crauwelts
- Legends:
 - Ronald Bradford
 - Marco Tusa
